

# Graph Coloring

1. Allow user to generate random graph or import a map.

Generate a graph or map

Generate random graph

Import map

Select your algorithm

Greedy

Welsh Powell

Dsatur

Start simulation

Graph type:  
Algorithm:  
Time Complexity:  
Space Complexity:  
Runtime:  
Number of Colors:

3. User selects which algorithm to color the graph

4. Start simulation and an animation in the graph showing the step by step of the coloring

5. Final results with all the data related to the algorithm and graph complexity.

2. Map or graph will show up here
